

Dear FCC,

I urge you to reject NAB's petition 04-160. Until I was introduced XM Satellite radio I only listened to my own cd's while driving in the car or relaxing at home. Thanks to this new technology I am now able to hear new music daily without having to remember I can't afford to buy more cd's that I would like to hear. The XM Instant Traffic and Weather reports are also one of the biggest helps to me in my personal lifestyle. I don't have to sit and wait for commercials on the weather channel on television until the program decides to tell me about my area. Please do not limit XM Satellite radio from features I and millions of others are willing to pay for. With our limited economy, if so many people are willing to pay for all the features Satellite radio has to offer, you should know it is obviously worth more than something simple. We have better things to do with our earned money than waste it on things we don't need.

Thank you,
Kim Frazier
